- Adjustable timer ensures accurate, repeatable peeling times.
- Modular construction facilitates easy maintenance.
- Thicker peeling plate delivers longer operating life.
- Suitable for medium to large kitchens with single-phase power supply.

Full Description

The versatile, energy-efficient MF10 Onion Peeler (1PH) is the ideal onion peeler for medium to large kitchens with a single-phase power supply.

With a thick peeling plate for long operating life, the MF10 Onion (1PH) is able to peel up to 143.5kg of onions per hour in 10kg batches making it a cost-effective and labour-saving solution. For best results, we recommend onions are topped and tailed before peeling, and hand finished afterwards.

Easy to operate, the unit comes with an integral stand and removable filter basket. It has an interlocking lid and door for user safety. The MF10 Onion (1PH) has a perspex viewing pane to monitor progress, and an adjustable timer for accurate, repeatable peeling times.

The MF10 Onion (1PH)'s modular construction includes smooth stainless steel waste pipes and water inlets to flush through onion peelings and prevent blockages. It allows simple installation and maintenance, whilst its latched lid ensures a water-tight seal.
