### Description

The Gastronorm refrigerators in the Profi-Premiumline provide everything professionals could want in terms of freshness and convenience. State-of-the-art electronics combined with fine-tuned refrigeration components ensure the high performance of these appliances. The temperature can be set as required from +1°C up to +15°C even at ambient temperatures of up to +43°C. The clearly arranged, HACCP-compliant electronic controller comes with a serial interface for continuous temperature registration and a volt-free alarm contact for external fault warning.
