### Description

**Product Description** The SCU1425 takes affordable display refrigeration to a new level of quality. This cabinet is all about making the most out of the product being displayed inside. The unit stands as high as an equivalent display cooler with light canopy but the SCU comes with a full height door to maximise display space. The clever interior lighting has three LED light strips (one vertical strip down each side and one horizontal across the top). These are set into the door frame and illuminate the product from the front. The black finish emphasises the product in the cabinet making it stand out, drawing the eye to what is inside the fridge. The door is "frameless" where the glass goes to the edge of the door creating a smooth, seamless finish to the front of the unit. Fan assisted cooling ensures even cooling over the whole cabinet and a faster pull-down time when re-stocked. This really is the display cooler to make your product stand out from the rest.
